NON-DISCLOSURE AND COLLABORATION AGREEMENT

Between Stichting Target 8.9 and Master's Student

This Agreement is entered into by and between:

STICHTING TARGET 8.9, a private and independent foundation organized and existing under the laws of the Netherlands, with its principal office located at Platinaweg 25, 2544EZ 's-Gravenhage The Hague, The Netherlands, duly represented by Mr. Alexander Panczuk, its Executive Director and authorized representative (hereinafter referred to as "T89" or the "Foundation"), acting in strategic alignment and partial coordination with the TUI Care Foundation, a related but legally independent organization promoting sustainable tourism and economic development. Both the Foundation and the TUI Care Foundation are legally independent from the TUI Group, although they collaborate closely on strategic projects.

– and –

The Student: (Name, ID Number, Address):_____ (hereinafter referred to as the "Student")

RECITALS

- This Agreement is entered into in the context of academic collaboration with the Master's program in Data Science & Big Data at Universidad Complutense de Madrid (the "Master's Program"), as described at: https://www.nticmaster.es/
- The purpose of this collaboration is to enable the Student to engage with a real world project proposed by the Foundation and to develop practical, data-driven solutions using AI and predictive analytics. The work shall support tourism related sustainability goals in Spain—one of the world's leading tourist destinations. Outstanding proposals may be selected for advancement into a second phase, which includes business acceleration and further technical development.
- This Agreement does not constitute an employment relationship nor a service contract. The collaboration is exclusively academic in nature and is part of the Student's learning process, with no remuneration involved.

CLAUSES

1. Scope of Work

The Student commits to analyzing a tourism-related problem or opportunity proposed by the Foundation using methods from data science and big data analytics. The project will serve as the basis for the Student's Final Master's Thesis (TFM). The Foundation will outline the scope, provide access to non-public data as needed, and facilitate periodic

mentoring.

2. Deliverables

The Student will submit a final report to the Foundation that includes: (i) Diagnostic and analytical findings; (ii) Concept and structure of any developed tools or models; (iii) Implementation roadmap and usage guidelines.

3. Confidentiality

The Student agrees to keep confidential all information received from the Foundation, whether oral, written, digital, or in any form. This obligation remains in force during the term of the project and for three (3) years thereafter. It includes an obligation not to share, publish, or disclose the information to any third party without the Foundation's prior written consent. Limited disclosure to the Master's Program faculty is permitted under anonymization or prior approval.

4. Foundation Support

The Foundation will provide guidance, supervision, and data throughout the research timeline. A detailed schedule and milestones are included in Annex I.

5. Disclaimer and Limitation of Liability

The Student acknowledges that the results, recommendations, or tools developed are non-binding and the Foundation is under no obligation to implement them. The Student is solely responsible for the authorship of the TFM and its academic integrity.

6. Evaluation and IP Rights

The final report submitted by the Student will serve both as a deliverable to the Foundation and the Student's academic thesis to be evaluated by the university. All intellectual property (IP) and know-how resulting from the project will belong to the Foundation. However, the Student shall retain recognition as author.
